

### Amendments to the Claims

Please amend Claims 1-11 and 21. The Claim listing below will replace all prior versions of the claims in the application.

#### Claim Listing

1. (Currently Amended) A method for downloading a file from a remote storage center to an end-user computer for content provided from a content server, said method comprising ~~the steps of:~~
  - receiving a request from an end-user computer for content at a content server;
  - transmitting from said content server to said end-user computer, in response to said end-user request, said content comprising at least one storage resource locator ("SRL"), wherein said SRL comprises a unique file identifier generated from the contents of a file to identify the file associated with said content;
  - transmitting a request for said file from said end-user computer to a remote storage center, including transmitting said SRL for said file; and
  - transmitting, from said storage center to said end-user computer, said file identified by said SRL.
2. (Currently Amended) The method as set forth in claim 1, further comprising ~~the steps of:~~
  - transmitting from said content server to said end-user computer an SRL further comprising an authentication certificate; determining, at said storage center, using said authentication certificate, whether said request is valid; and
  - transmitting, from said storage center to said end-user computer, said file only if said request is valid.
3. (Currently Amended) The method as set forth in claim 1, further comprising ~~the steps of:~~
  - transmitting to said end-user computer an SRL further comprising a time-out parameter; and determining whether said request is valid through said time-out parameter.
4. (Currently Amended) The method as set forth in claim 1, further comprising ~~the step of:~~
  - embedding said SRL into said content after receiving said request from an end-

user computer for said content.

5. (Currently Amended) The method as set forth in claim 1, wherein ~~the step of~~ transmitting content comprises:
  - transmitting hyper-text mark-up language ("HTML") content; and ~~the step of~~ embedding said SRL into said content comprises ~~the step of~~ embedding said SRL into said HTML.
6. (Currently Amended) The method as set forth in claim 4, wherein ~~the step of~~ embedding said SRL into said content comprises ~~the steps of~~:
  - storing at least one SRL for a file in an SRL file; and
  - extracting said SRL from said SRL file.
7. (Currently Amended) The method as set forth in claim 4, wherein ~~the step of~~ embedding said SRL into said content comprises ~~the steps of~~:
  - coupling a local device comprising a cache to said content server; storing at least one SRL for at least one file in said cache of said local device; and
  - extracting said SRL from said cache of said local device.
8. (Currently Amended) The method as set forth in claim 7, further comprising ~~the step of~~:
  - mounting said local device as a storage device for said content server for access to said SRLs.
9. (Currently Amended) The method as set forth in claim 1, further comprising ~~the steps of~~:
  - storing at least one SRL for at least one file in an SRL file;
  - storing said file for access by a file system; and
  - organizing said SRL files in a file system, accessible to said content server, with a file structure substantially similar to said file structure for said files.
10. (Currently Amended) The method as set forth in claim 1, wherein:

~~the step of~~ transmitting a request for said file from said end-user computer to a remote storage center comprises ~~the step of~~ transmitting a hyper-text transfer protocol ("HTTP") request; and

~~the step of~~ transmitting said file from said storage center to said end-user computer comprises ~~the step of~~ transmitting said files using HTTP.

11. (Currently Amended) The method as set forth in claim 10, wherein ~~the step of~~ transmitting, from said storage center to said end-user computer, said file comprises ~~the step of~~ transferring a large media object.
12. (Previously Presented) A system comprising:
  - content server for receiving a request from an end-user computer for content, and for transmitting to said end-user computer, in response to said end-user request, said content comprising at least one storage resource locator ("SRL"), wherein said SRL comprises a unique file identifier generated from the contents of a file to identify the file associated with said content;
  - storage center for receiving a request for said file from said end-user computer, including transmitting said SRL for said file, and for transmitting, from to said end-user computer, said file identified by said SRL.
13. (Original) The system as set forth in claim 12, wherein: said SRL further comprises an authentication certificate; and said storage center for determining whether said request is valid using said authentication certificate, and for and transmitting to said end-user computer said file only if said request is valid.
14. (Original) The system as set forth in claim 12, wherein: said SRL further comprises a time-out parameter; and said storage center for determining whether said request is valid through said time-out parameter.
15. (Original) The system as set forth in claim 12, wherein said content server further comprising processes for embedding said SRL into said content after receiving said

request from an end-user computer for said content.

16. (Original) The system as set forth in claim 15, wherein: said content comprises mark-up language ("HTML") content; and said content server further comprising processes for embedding said SRL into said HTML.
17. (Original) The system as set forth in claim 15, wherein: said SRL further comprising an SRL file; and said content server further comprising processes for extracting said SRL from said SRL file.
18. (Original) The system as set forth in claim 12, further comprising a local device, coupled to said content server, that includes a cache for storing at least one SRL for at least one file in said cache of said local device, wherein said content server further comprising processes for extracting said SRL from said cache of said local device.
19. (Original) The system as set forth in claim 18, wherein said content server comprises processes for mounting said local device as a storage device to said SRLs.
20. (Original) The system as set forth in claim 19, further comprising a file system, accessible to said content server, including at least one SRL file for storing at least one SRL, wherein said file system comprising a file structure substantially similar to a file structure for said files.
21. (Currently Amended) A storage center comprising:
  - storage for storing a plurality of files;
  - storage control for receiving a request from an end-user computer, remote from said storage center, for at least one file, and for transmitting said file to said end-user computer, said request comprising at least one storage resource locator ("SRL") corresponding to said file, and wherein said SRL comprises a unique file identifier generated from the contents of a file to identify the file associated with content that said end-user computer downloaded from a content server.

22. (Original) The storage center as set forth in claim 21, wherein:  
said SRL further comprises an authentication certificate; and  
said storage center for determining whether said request is valid using said authentication certificate, and for transmitting to said end-user computer said file only if said request is valid.
23. (Original) The storage center as set forth in claim 21, wherein:  
said SRL further comprises a time-out parameter; and said storage center for determining whether said request is valid through said time-out parameter.
